KTI Hydraulics Inc., was established in 1997. The vision of our two founders, George King and Robert W. Habermann, was the KTI design philosophy for the original Universal Manifold® concept.

This concept has inherent integral features that are incorporated in the machined Universal Manifold®. It weighs less than 2 pounds, has eighteen basic hydraulic circuits, allows the use of an assortment of optional pumps with different displacements, a selection of reservoirs with different capacities and will mount to both AC and DC electric motors.

The basic four cavities (“H” concept) uses SAE O-ring cap plugs, cavity plugs or self contained functional cartridge valves. This hardware assortment allows the design to achieve any one of the six basic single acting hydraulic circuits.

An external mounting surface is also incorporated in the machined Universal Manifold® design. It allows for custom multiple valve circuits to be mounted on the basic power unit. Preformed cavities allow the use of hexagon or square steel nuts to lock the body in place for aluminum to aluminum retention.

In 2002, the Universal Manifold® II was conceived and developed for double acting applications. This design complemented the Universal Manifold® I design. The two designs greatly expanded our circuit selection. In 2004, the Universal Manifold® III was developed for dual double acting applications. Then it was adopted for standard snow plow circuit w/power angling, crossover relief & lift check, lower w/ float function. From the snow plow circuit, we were able to design a Double Acting & Single Acting Function in one manifold without requiring additional hydraulic manifold.

All KTI hydraulics power units are 100% fully inspected to stringent test specifications. The tests insure to our customers that they will receive reliable, high quality hydraulic power systems that will perform to our design specifications.

RESERVOIR: 2 QT STEEL

DESCRIPTION:
KTI 12/24V DC AUXILIARY PUMP & MOTOR ASSEMBLY.

HYDRAULIC CIRCUIT

AS SHOWN:
MOTOR: 12/24V DC 4.5" DIAMETER MOTOR
STARTER: CONTINUOUS DUTY START SOLENOID
PUMP: STN PRESSURE LOADED GEAR PUMP

12V DC MODEL NUMBER	24V DC MODEL NUMBER	PUMP DISPL. in ³ /r (mL/r)	DIM A (IN)	DIM B (IN)	INLET	OUTLET
DC 4002	DC 4012	0.083 (1.36)	15.33	9.75	SAE #10 7/8-14	SAE #8 3/4-16
DC 4003	DC 4013	0.125 (2.05)	15.41	9.79		
DC 4004	DC 4014	0.167 (2.74)	15.49	9.84		
DC 4005	DC 4015	0.209 (3.24)	15.57	9.87		
DC 4006	DC 4016	0.250 (4.10)	15.64	9.91		

DESCRIPTION:
KTI 12/24V DC AUXILIARY PUMP & MOTOR ASSEMBLY.

HYDRAULIC CIRCUIT

AS SHOWN:
MOTOR: 12/24V DC 5.0" DIAMETER MOTOR
STARTER: CONTINUOUS DUTY START SOLENOID
PUMP: STN PRESSURE LOADED GEAR PUMP

12V DC MODEL NUMBER	24V DC MODEL NUMBER	PUMP DISPL. in ³ /r (mL/r)	DIM A (IN)	DIM B (IN)	INLET	OUTLET
DC 5002	DC 5012	0.083 (1.36)	15.33	2.31	SAE #10 7/8-14	SAE #8 3/4-16

DESCRIPTION:

KTI stackable double acting manifold. Each manifold consists of (1) double acting circuit w/ or w/o load holding capabilities. the stackable manifold is for mounting on UM I to create functionally diverse circuits. All connection ports are SAE #6(9/16-18) O-ring ports.

4w3p motor center cartridge solenoid valve
(option: 4w3p close center cartridge valve)
4way cavity plug

(2) 4w3p motor center cartridge solenoid valve
(option: 4w3p close center cartridge valve)
(2) KTI proprietary load holding valve

(3) 4w3p motor center cartridge solenoid valve
(option: 4w3p close center cartridge valve)
(3) KTI proprietary load holding valve

PERFORMANCE:

1. DISPLACEMENT: 0.038-0.368 in³/r.
2. WORKING PRESSURE: 2000 PSI, MAX PRESSURE: 4000 PSI.
3. ROTATING DIRECTION: COUNTERCLOCKWISE.

DESCRIPTION:

The KTI STN series pressure load gear pump consists of a gear pair supported by two aluminum bearing blocks, center housing, front and rear cover with American Standard 4F17 mounting. The STN pump features simple structure, high mechanical and volumetric efficiency, low noise level as well as high reliability. It is widely used in the hydraulic system of truck, lift and transport machinery, mine machinery, and agriculture machinery, etc.

PART NO.	DISPLACEMENT in ³ /r (mL/r)	PRESSURE(Bar/PSI)		A(IN)	B(IN)	INLET	OUTLET

INSTALLATION RECOMMENDATIONS

- 1) To avoid contamination, do not remove plastic port plugs until fittings are to be installed.
- 2) Power Unit mounting flange must make full contact with equipment mount; do not use the mounting bolts to force alignment of the power unit on to the equipment mount.
- 3) If pump fails to prime, remove Cartridge Check Valve and start the power unit until hydraulic oil flows from the valve cavity and reinstall the Cartridge Check Valve. *(does not apply to double acting units)*
- 4) Fluid temperature should not exceed 150°F, System reliability and component service life will be reduced.

INLET CONDITIONS

- 1) Positive pressure must be available at the pump inlet while it is operating, overrunning load can cause the pump to cavitate. Consult the factory for inlet pressure requirements and speed limitation.

FILTRATION

- 1) For maximum pump and system component life, the system should be protected from contamination at a level not to exceed 125 particles greater than 10 microns per milliliter of fluid (SAE Class 4 / ISO 16/13).

SERVICE

- 1) Clean fluid essential to system reliability and longer component service life.
- 2) It is recommended that for every 4,000 operating hours or once a year, whichever occurs first, the air filter/ breather cap and suction strainer should be replaced or thoroughly cleaned.
- 3) Every 4,000 operating hours, or once a year, whichever occurs first. Drain hydraulic oil from reservoir and remove reservoir from Manifold (end plate). Use WD-40 or similar product to wipe down and remove all debris inside the reservoir, also check the magnet for signs of metal particles. Lubricate reservoir O-ring with hydraulic fluid to remount the reservoir. Insure reservoir O-ring is not pinched or pushed out of groove during installation.
- 4) For TEFC motors, remove fan casing and wipe fan blade and casing.
- 5) For other service, please consult factory for proper procedures.

Fluid Recommendations

KTI Hydraulics Inc. recommends using a premium hydraulic oil to ensure optimum performance and system life.

Select oil that has anti-wear properties, rust and oxidation inhibitors, foam inhibitors and good stability. Examples of premium grade hydraulic oils: Chevron Rando HDZ, Mobil DTE 10, and DTE 20 series, AMSOIL, and Shell Tellus.

Automotive Transmission Oils are acceptable under normal conditions.

Aviation Oils such as Valvoline ROYCO series or Mobil Aero HF or HFA may be used in **prolonged & extreme cold** environments.

Do Not Use Biodegradable Hydraulic Fluid. Do Not Mix Oils.

<u>Ambient Temperature Range</u>	<u>ISO Viscosity Grade</u>
- 20°F to + 32°F (- 29°C to + 0°C)	15
+ 14°F to + 120°F (- 10°C to + 49°C)	22, 32, ATF

Do not operate Power Unit above recommended Fluid Temperature Range.

Premium hydraulic oil with proper ISO Viscosity Grade and additives such as Chevron EP, Mobile DTE 10, DTE 20 series, or Shell Tell us would be acceptable.

In Most Applications Use ATF Dextron III

KTI Hydraulics Inc. Limited Warranty

KTI Hydraulics warrants its products free from defects in material, workmanship and design. The period of warranty for DC units is (2) two years and AC units is (1) year after the date of manufacture. Under no circumstances is there any warranty of fitness for a particular use.

KTI hydraulics cannot and does not accept responsibilities for any of its products that have been subjected to improper installation, application, negligence, tampering or abuse. All repairs must be authorized by KTI Hydraulics to reduce the risk of voiding the warranty. KTI Hydraulics liability warranty shall extend only to replacement or repair, f.o.b. KTI.

KTI Hydraulics makes no other warranties, expressed or implied, and is not responsible for any consequential damages resulting from use by any buyer or user. KTI Hydraulics Inc.'s liability is limited to the value of the product sold or obligated repair or replacement of a defective part.

For warranty request and repair please contact KTI Hydraulics Customer Service.

Power units without model & serial numbers will not be covered under warranty. When calling, please have the model and serial number of the power unit available to facilitate your request.

2621 S Daimler St

KTI Hydraulics Inc Limited Warranty and Return Goods Authorization (RGA) Procedures

KTI Hydraulics warrants its product free from defects in material, workmanship, and design for a period of two years after date of Manufacture on DC Units and one year from date of manufacturer on AC Units. Under no circumstances is there any warranty of fitness for a particular use and KTI Hydraulics cannot and does not accept responsibilities of any type or any of its products that have been subjected to improper installation, improper application, negligence, tampering or abuse. All repairs must be authorized by factory to reduce the risk of voiding the warranty. KTI Hydraulics' liability warranty shall extend only to replacement or correction, f.o.b. KTI hydraulics. We make no other warranties, expressed or implied, and are not responsible for any consequential damages resulting from use by any buyer or user, our liability being limited to the value of product sold, or obligated to repair or replace a defective part.

For warranty information or warranty request please contact Customer Service.

Power units without model number & serial number will not be covered under warranty, when calling please have model number and serial number of the power unit.

Return Goods Authorization (RGA) Procedures:

The following requirements must be met by Buyer to return goods for warranty inspection.

- 1) Warranty request must be made via written / e-mail / voice by Buyer to KTI Hydraulics, Inc. with following information:
 - a. KTI Hydraulics Model Number / P/N & Serial Number.
 - b. If lacking Model or Serial Number, It is possible to cross reference through buyer's P.O or KTI Hydraulics Invoice Number.
 - c. Quantities of unit/s under question.
 - d. Reason for return – defect, warranty, or repair & suspected reasons for failure.
- 2) KTI Hydraulics, Inc will issue a RGA number and fax a RGA form with this number to the Buyer. All corresponding paper work will reference this RGA number.
- 3) All RGA numbers are effective 60 days from the issuing date. Buyer has the responsibility to insure proper documentation (item d), proper packaging and ship on prepaid basis unless obtaining prior written authorization from KTI Hydraulics. Return goods shipped to KTI freight collect, or C.O.D. will result in KTI Hydraulics, Inc.'s refusal of said shipment. Return goods received by KTI Hydraulics after the 60 days will be subject to repair and repair charges. KTI Hydraulics will take possession of said return goods when it arrives at KTI Hydraulics, Inc. premise in good order. KTI Hydraulics will refuse any returned goods shipment if it contains power units or parts not manufactured or sold by KTI Hydraulics, Inc. KTI Hydraulics will not be responsible for any extraneous parts that are not manufactured or sold by KTI Hydraulics, Inc.
- 4) All return goods are subject to KTI Hydraulics, Inc. incoming inspection.
